Rancho Vista Boulevard Resurfacing Project to Begin July 8

PALMDALE — The City of Palmdale's resurfacing of all lanes of Rancho Vista Blvd. from 30th St. West to Ave. N-8, will begin on July 8 and continue through July 28.

The grinding work will begin Saturday morning July 8, and continue on Monday morning July 10. Overlay work will begin Monday evening July 10. Grinding work will be done during the day between 6:30 am and 5 pm and overlay work be done at night between 8 pm and 5 am. Resurfacing operations will be complete by July 21. Restriping, utility adjustment, and traffic loop replacement will be done by July 28. All work will be complete before local schools return to session the week of Aug. 7.

Motorists should expect delays and are advised to take alternate routes. Traffic will be reduced to one lane in each direction and the road surface may be rough as work progresses. Work crews and equipment will occupy the roadway day and night. Access to side streets and commercial parking lots may be limited or temporarily restricted in accordance with the traffic control plan and the work location. Please follow all traffic control and be alert, cautious, and patient.

The City of Palmdale's Capital Improvement Project No. 665 includes a budget of approximately \$1.6 million, all federally funded through a mix of local Surface Transportation Program (STPL) monies and toll credits. The awarded contractor, Hardy & Harper Inc. of Santa Ana, will be resurfacing over 1,200,000 square feet of roadway along the 2.6 mile stretch of Rancho Vista Blvd from 30th St. West to Ave. N-8.

For more information, please call Public Works at 661/267-5300.
