I have lived here in Palmdale for many years and I have never worked in this city. I drive many miles everyday and my desire is to work here to be closer to my family and be able to enjoy time with my grandkids. Please take into consideration my desires to be able to find work here in Palmdale. Thank you and God bless.
Alexis Cardona B

Resident - Carpenter

It is a privilege to be a part of the growth of an important city that is Palmdale. Conform to the vision being imagined by this community and their representatives. Congratulations on such a grand project moving the community toward the future.

Gracias por su interés en el Plan del Área de la Estación del Tren de Alta Velocidad en Palmdale. Sus comentarios son bien recibidos.

I am a resident of this city, there are 7 members in my household, the motive behind my participation in this event is to support the cause of bringing more opportunities of employment close and that way be able to work a regular shift and be able to dedicate more time towards my family. I like this new project (Palmdale High-Speed Rail Station) now that it will lead to the creation of more opportunities to work within the community.

I would like to whoever is in charge of the project continue it because if there's a big job local in the area I would save much more time with my family; I drive everyday to LA to go to work. There's always car accidents in the way that we can be part of because we have to get up early so we avoid traffic. Thank you for making our community bigger with these projects.

Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

But creating more projects in the Antelope as carpenters we will be closer to our families. Not spending so much time on the road driving and being closer to our community so we can help out in activities and volunteer work.

My name is Sean Mann. I am a lifelong resident of the Antelope Valley, and have been able to see the growth & development of this Valley. I look forward to seeing this project come to fruition in Palmdale. It will not only bring economic growth to the community, but will hopefully bring hundreds of jobs to local carpenters in this area. It allows members of our communities live & work closer to home, which will in return, economic prosperity will increase, decrease commute time & more time at home with their families. We as the carpenters union, look forward to this project fruition.
I hope there is parking planned. Most people who do business in Palmdale travel miles away from here. Many people who commute here from Los Angeles, Glendale, etc. will need parking. The current center of Palmdale is a prime location for a transit center. What is the plan for all of the low-cost "bad housing" currently there? The City needs to plan for some indoor settings as well as outdoors.

As a Metro rider and frankly knowing the area, putting this high speed rail 400 feet under Action 4 going under the aqueduct concerns me as a constant Metro rider. As much as having full train access to all of California excites me as a student, the idea of putting a fast train underground on the fault line is clearly clearly fated to be crushed or damaged with any earthquake. As a rider I would NOT pay for a ticket & tell fellow students of the danger. It’s not a good idea but some ANSWERS would be nice.

As a metrolink rider I think this project will bring my full release, please I have been dreaming in this project 23 years since I started commuting from Palmdale to Burbank.

Also we need a bridge urgently in Sierra Hwy. and Pearblossom traffic there is horrible.

Thank you.

Rene' R.
Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

Thank you for the opportunity. I am excited for this project as a carpenter. We look forward to big developments. This will help me bring hours for my health, pension, and vacation benefits. But truly, I would like to address new opportunity for up-and-coming apprentices in our program. Local kids moving into the workforce will have that chance of learning a carpentry trade. Working local, they will spend money the local economy. Possibly buying a home, locally and supporting civil officials to bring more jobs to Palmdale. It creates new jobs for opportunities for young men and women of this community.

Residents

Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

Comments below were received from the above stakeholders through an ASL interpreter.

1. Please provide more trees and shade in the station area. The canopy seems transparent in the windings.

2. Would it be possible to utilize the top of the canopy for solar panels? This would be more efficient to power some elements of the area.

3. I want to comment on the aerodynamic features of the canopy. Palmdale can be extremely windy and this should be considered in the design of any structure.

I have been in Palmdale since 1989. Several times I heard Palmdale Airport would be built for international flight. Although the huge land is there, nothing happened yet. Now we are waiting for high-speed train. I hope it would be done. This town needs an airport and high-speed train. Fly 14th is already packed and computer are tired. This will cause many leave the town. So City of Palmdale should do something A.S.A.P. Thanks.

Jack Hormoz

Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

1. What are the eco-friendly features?
2. What will be the carbon footprint?
3. How are low-income residents being taken into account.

Comment:
1. Landscaping design should embrace native plants and low water consuming trees.
2. Architecture should reflect the Antelope Valley setting and appear from other cities in Southern Cali.

Thank you for your time.

Great presentation. Very informative.
Our organization is interested in partnering with the city in planning this and providing services to residents using the station and residing in the area.

Union Carpenter (661)

Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

I been a carpenter 20 years and always commute to LA years. It will be great to get this project to this city so we can be local and have more time with family. Less traffic in freeways are really needed this project to all this.

Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

Commuters need the Boys N Girls club and it’s current location would be ideal.

Please consider making improvements to keep its current location as a marketing tool to endorse the Palmdale High-Speed Rail Station Area Plan.

I would really like to see a robust plan to address the potential of increased homelessness/homeless people in the new development. All these new amenities will surely attract these people, and a plan needs to be in place to address how these people will be removed. These people can potentially make this new station a new place for transients from LA. This is not good for business. Please address this as it is important and planning is needed.
Alex Blanco

Thank you for your interest in the Palmdale High-Speed Rail Station Area Plan project. We welcome your comments.

Palmdale must evolve to attract people from neighboring cities to visit and stimulate our local economy. The project is a great idea.

As a resident I support this project and being in the Carpenters Union with this project I will be able to work locally if the Union is able to work along with the city. I would be able to enjoy more time with the family and also able to work on projects at home with the family to improve my life and style of living. Work as far as 24 hours it would be a great help on my pocket and time.
I am a local resident that is looking to work local. I have been traveling down hill for many years, this will definitely allow me to spend time with my family on the later days of my career, as well as offering benefits to all carpenters & workers in general. Project labor agreements are beneficial to middle class working community.
